

The CMR and CMS range of recessed and surface compact luminaires are ideally suited for retail and commercial applications where a neat visual appearance is paramount.

The CMR luminaires have a one piece bezel trim finished RAL 9010 as standard with additional finishes available to order, and retains a vertical or diamond faceted or smooth finished specular aluminium reflector providing a compact and versatile luminaire.

The CMS luminaire has a polycarbonate moulded diffuser with a white trim as standard, alternative finishes available.

Quick fit suspension clips allow for an easy and positive retention within most ceiling types and fused high frequency control gear offered as standard with analogue or digital dimmable control gear available to order.

Decorative accessories can be incorporated with an additional suffix as indicated below, with further IP44 and IP54 versions available to suit more arduous locations.
