

Creative lighting in conjunction with design flair can open up new interiors whilst still allowing compliance with the LG3a requirements.

The Axis range of suspended luminaires offers and meets these requirements. The 'Axis I' (AX1) canopy is constructed from perforated zintec sheet steel with welded ends; the 'Axis II' (AX2) canopy is constructed from an aluminium extrusion ; both available RAL9010 or mercury silver.

All luminaires are supplied with high frequency control gear for the main fluorescent component and a separately fused circuit to operate 2 x 'adjustable' or 'fixed' mains voltage LED luminaires as standard. Alternative gear and lampway arrangements available to suit individual requirements.

Continuous mounting can be implemented by end to end fixing or dummy infill sections made to measure.

A white micro perforated and specular wedge attachments are offered as standard with alternative decorative accessories available.

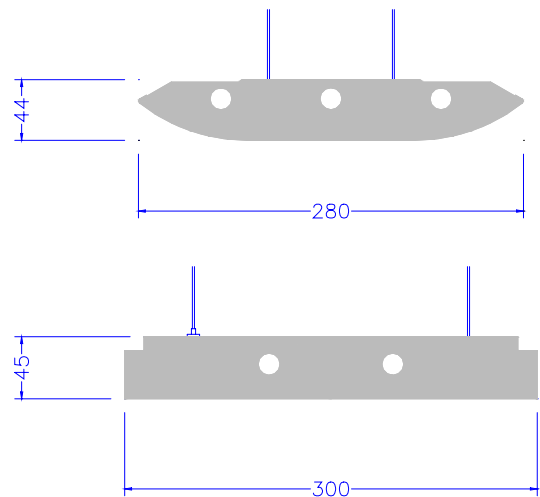

SPECIFICATION

Body

- **AX1** luminaires with rolled zintec sheet steel
- **AX2** luminaires with extruded aluminium
- Integral fused high frequency control gear
- Alternative gear options available
- Luminaire shown AX2 228 2AWD SP
